

INOXMARE[®]

EPDM SEALING TAPE, SELF-ADHESIVE

**DATA SHEET
ART.9666**

**YOUR NEEDS
OUR MISSION**

ART.9666

TECHNICAL SPECIFICATIONS

Cellular rubber profiles based on EPDM, such as square profiles, square strips, rectangular profiles or sealing strips, are closed-cell foam-shaped elastomer strips without outer skin. EPDM cellular rubber sealing tape is a popular sealing profile due to its high weather resistance, good restoring force and impact elasticity as well as excellent temperature behaviour, even at low temperatures.

EPDM cellular rubber has very good ageing, UV and ozone resistance as well as sound, heat and vibration protection, does not discolour and shows no crystallization. Among other things, these EPDM strips are used for soft bearing, insulation, sealing and isolation.

Material	Ethylen-Propylen-Dien-Monomer-Rubber (EPDM)
-----------------	---

YOUR ADVANTAGES

 VERSATILE IN APPLICATION

 UV AND WEATHER RESISTANT

 SIMPLE AND QUICK INSTALLATION

› Due to self-adhesive properties

PRACTICES

 SEALING

 ISOLATION

 INSULATION

 SOFT BEARING

WE'D BE PLEASED TO ADVISE WITH YOUR APPLICATION.
